DETAILED ACTION

Election/Restrictions

This application contains claims directed to the following patentably distinct species of the claimed invention:

a) Species I drawn to a method for manufacturing a memory cell comprising a substantially convex upper plug surface profile in contact with the bitline . It appears that the species read into claims 1-5,10 & 14.

b) Species II drawn to a method for manufacturing a memory cell comprising a polysilicon plug filling contact hole to less than the uppermost extent of the insulating side wall, and defines an upper plug surface profile substantially free of concavities in contact with the bit line . It appears that the species read into claims 6-9.

c) Species III drawn to a method for manufacturing a memory cell comprising a first , second and third orthogonal dimensions which is one-half or two one-half of a bitline contact feature, wherein the dimensions define a 6F2 memory; and wherein the storage node bounded by insulating side walls. It appears that the species read into claims 11-13 & 15-18.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims

Art Unit: 2813

readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

A telephone call was made to Joan William on 12/28/04 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
